

Copper Structured Cabling Solutions

Consolidation Frame

19" Overhead Cable Pathway Rack

Global **SIX**

Specifications

- Increased cable density and rack space within the same floor square
- Welded frame - no assembly required
- 19" EIA mounting holes for cage nuts
- Suitable for top of rack patch panels
- Can be installed parallel and perpendicular to each other
- Easy installation and light weight
- Optional cable management rings
- Available in one RU increments from 2RU-8RU

Key Benefits

The 19" Overhead Cable Pathway Rack simplifies above rack cable management with an easy-to-install rack system that adds additional RU space without taking additional floor space. The overhead rack is designed to easily install to wire-mesh tray or suspended from threaded rod.

The unique design allows for any number of mounting locations and directions, so there is no limit to its uses. Made from a welded steel frame, it is rugged, and ready to install right out of the box. The overhead racks are perfect for tech refresh designs in Data Centers and small data rooms, as well as large new installs.
